TRAFALGAR OIL & GAS COMPANY U.S.A.

Integrity • Reliability • Global Reach • Energy Excellence

Trafalgar Oil & Gas Company represents a longstanding commitment to integrity, reliability, operational excellence, and responsible business practices within the global energy industry. Through decades of industry experience and an expanding international network, the Company is focused on providing dependable petroleum and energy solutions to qualified clients, strategic partners, and international markets.

Our business philosophy is founded on **trust, transparency, quality, professional execution, and long-term commercial relationships**. These principles guide our approach to every transaction and reinforce our reputation as a dependable participant in the international energy sector.

TRAFALGAR FUELS: INTEGRATED UPSTREAM & DOWNSTREAM ENERGY OPERATIONS WITH CONSORTIUM GROUP OF REFINERIES.

At **Trafalgar Fuels**, we recognize that today's energy markets require more than the traditional purchase and sale of petroleum products. They require an integrated understanding of production, refining, supply, logistics, storage, transportation, documentation, financing, compliance, and final delivery.

Our business model is designed to connect key elements of the global energy value chain from the sourcing and production of energy resources to the supply and delivery of refined petroleum products to international markets.

Through established industry relationships and strategic commercial partnerships, Trafalgar Fuels participates across both **upstream and downstream segments**, enabling the Company to respond effectively to evolving market conditions and the diverse requirements of its customers.

UPSTREAM OPERATIONS: ENERGY AT ITS SOURCE

The upstream sector forms the foundation of the global petroleum industry and encompasses the exploration, development, extraction, and production of crude oil and natural gas resources.

Trafalgar Fuels maintains strategic relationships within the upstream energy sector and evaluates opportunities involving petroleum and natural gas resources in international markets.

Our approach emphasizes **responsible resource development, operational efficiency, technological advancement, safety, and environmental stewardship**.

EXPLORATION & EXTRACTION

Successful oil and gas exploration requires extensive geological expertise, seismic analysis, reservoir evaluation, engineering capabilities, and advanced extraction technologies.

Through its industry network and strategic relationships, Trafalgar Fuels engages with opportunities associated with both onshore and offshore petroleum resources.

We recognize the importance of modern exploration technologies and environmentally responsible extraction practices. Our objective is to support efficient resource development while maintaining appropriate attention to safety, regulatory requirements, environmental considerations, and long-term commercial viability.

PRODUCTION & INNOVATION

Innovation is fundamental to the continued advancement of the global energy industry.

Modern petroleum production increasingly incorporates advanced engineering systems, digital monitoring, automation, reservoir-management technologies, enhanced recovery techniques, and sophisticated data analysis.

Trafalgar Fuels supports the adoption of innovative technologies and operational practices capable of improving productivity, strengthening safety standards, increasing resource efficiency, and reducing unnecessary environmental impact.

As global energy markets continue to evolve, the Company also recognizes the increasing importance of renewable and lower-carbon energy technologies within the broader energy transition.

DOWNSTREAM OPERATIONS: CONNECTING ENERGY WITH GLOBAL MARKETS

Downstream operations represent the critical link between energy production and the industries, transportation networks, governments, businesses, and consumers that depend upon refined petroleum products.

Trafalgar Fuels' downstream activities focus on the **sourcing, supply, trading, logistics, distribution, and international delivery of petroleum and energy products.**

Through relationships with refineries, producers, suppliers, storage operators, shipping companies, logistics providers, financial institutions, distributors, and qualified buyers, Trafalgar Fuels works to facilitate professionally structured petroleum transactions across international markets.

Our objective is clear:

To connect reliable energy supply with genuine global demand through disciplined, transparent, and professionally managed transactions.

REFINING & PRODUCT SUPPLY EXCELLENCE

Refining is one of the most important components of the downstream petroleum industry, transforming crude oil and feedstocks into the essential products that support the global economy.

Through its refinery, producer, and strategic supply relationships, Trafalgar Oil & Gas Company facilitates access to a diverse portfolio of petroleum and energy products, including:

EN590 Diesel • ULSD • Gasoline • Jet A-1 Aviation Fuel • Marine Fuel • Fuel Oil • Kerosene • LPG • LNG • Petrochemical Feedstocks • Bitumen • Sulfur • Petroleum Coke • Other Refined Petroleum Products

Our supply strategy emphasizes **product quality, internationally recognized specifications, reliable documentation, competitive commercial structures, efficient logistics, and dependable delivery.**

Trafalgar Oil & Gas places significant importance on ensuring that transactions are conducted in accordance with applicable commercial procedures, contractual requirements, product specifications, inspection protocols, and regulatory standards.

GLOBAL DISTRIBUTION & LOGISTICS

Reliable product availability must be supported by an equally reliable logistics network.

Trafalgar Fuels coordinates with established international logistics providers to facilitate the movement of petroleum products from their respective sources to destination markets.

Depending upon the transaction, products may be transported and handled through:

Marine Tankers • International Ports • Pipelines • Storage Terminals • Tank Farms • Distribution Facilities • Approved Logistics Networks

Our commercial team works to coordinate the various components of the transaction, including product availability, documentation, inspection requirements, loading schedules, shipping arrangements, storage, and final delivery.

The objective is to provide our clients with an efficient and professionally coordinated supply-chain experience from **source to destination**.

CUSTOMER-FOCUSED ENERGY SOLUTIONS

At Trafalgar Oil & Gas, we understand that our customers require more than competitive pricing.

They require **reliability, transparency, responsive communication, consistent product quality, dependable logistics, accurate documentation, and professional execution**.

Our customer-focused approach is therefore centered on understanding each client's specific requirements and developing commercially practical supply solutions capable of supporting both immediate procurement needs and long-term energy strategies.

Our goal is not simply to complete individual transactions, but to develop **enduring commercial partnerships based on trust and measurable performance**.

COMMITMENT TO SUSTAINABILITY & RESPONSIBLE ENERGY

Trafalgar Oil & Gas recognizes that the global energy industry is undergoing a significant transformation.

Energy security must increasingly be balanced with environmental responsibility, operational efficiency, technological advancement, and the development of lower-carbon solutions.

We support initiatives designed to improve energy efficiency, reduce unnecessary emissions, promote responsible resource utilization, and evaluate opportunities involving renewable and alternative energy technologies.

Our commitment to sustainability is based on continuous improvement and responsible participation in the evolving global energy landscape.

CORPORATE PROFILE

TRAFALGAR OIL & GAS COMPANY U.S.A.

Global Petroleum & Energy Supply Solutions

Trafalgar Oil & Gas Company operates as subsidiary of **Trafalgar Holdings USA & LATAM**.

U.S.A. Federal ID: 47-2032418

CAGE Code: 9PD61

Founded: 1997

Since its establishment, Trafalgar Oil & Gas Company has focused on developing reliable commercial relationships within the petroleum and international energy sectors.

With decades of industry experience, the Company has developed relationships spanning multiple components of the energy value chain, including producers, refineries, suppliers, distributors, logistics providers, storage operators, financial institutions, and international buyers.

Our commercial philosophy emphasizes **integrity, reliability, competitive supply solutions, professional transaction management, responsible business practices, and long-term relationships**.

OUR PETROLEUM & ENERGY PORTFOLIO

Trafalgar Oil & Gas Company specializes in the sourcing and supply of petroleum and energy commodities for international markets.

Our portfolio includes products serving the transportation, aviation, marine, industrial, infrastructure, manufacturing, and power-generation sectors.

Through our international network, we seek to provide qualified clients with reliable access to petroleum products while maintaining competitive commercial terms and dependable delivery structures.

We recognize that access to energy is fundamental to economic growth.

Industries, governments, transportation systems, infrastructure projects, and businesses depend upon reliable energy supplies to maintain their operations.

For this reason, Trafalgar Oil & Gas views its role as extending beyond the traditional relationship between supplier and buyer.

Our objective is to become a trusted long-term energy partner to our clients.

RELIABILITY • QUALITY • SAFETY • INTEGRITY

At Trafalgar Oil & Gas, we understand the critical importance of reliability, product quality, operational safety, documentation, and commercial integrity within the international energy sector.

Petroleum transactions may involve significant financial commitments, multiple jurisdictions, complex logistics, strict product specifications, inspection procedures, regulatory requirements, international banking instruments, and extensive documentation.

For this reason, our approach emphasizes disciplined transaction management and clear communication among all relevant commercial parties.

Our guiding objective remains consistent:

To deliver dependable energy solutions through professional execution, responsible business practices, and lasting commercial relationships.

A PROVEN TRACK RECORD OF MORE THAN 20 YEARS

Experience creates confidence, and confidence creates trust.

Trafalgar Oil & Gas brings more than two decades of energy-sector experience to its commercial relationships.

Our experience provides valuable insight into the complexities associated with petroleum sourcing, refinery supply, international logistics, commodity trading, contractual documentation, inspection procedures, banking requirements, and international delivery.

Our longstanding participation within the energy sector demonstrates our commitment to developing sustainable commercial relationships rather than focusing solely on individual transactions.

Whether supporting recurring petroleum requirements or large-volume international supply opportunities, Trafalgar Oil & Gas strives to provide responsive service, reliable coordination, and commercially practical solutions.

PROVEN TRACK RECORD OF EXCELLENCE

Trafalgar Oil & Gas has built its business philosophy around **professionalism, consistency, accountability, transparency, and dependable execution.**

Every international petroleum transaction presents its own commercial and operational requirements.

Product specifications, quantities, pricing structures, refinery availability, loading ports, destination ports, inspection procedures, shipping arrangements, documentation, banking instruments, and delivery schedules must all be carefully coordinated.

Our industry experience enables us to approach these requirements systematically while maintaining clear communication among the relevant parties.

Whether a client requires recurring fuel deliveries or specialized petroleum commodities, our objective is to establish supply structures capable of supporting immediate requirements while creating opportunities for sustainable, long-term commercial growth.

REFINERY ALLOCATIONS & STRATEGIC SUPPLY RELATIONSHIPS

Trafalgar Oil & Gas continues to expand and strengthen its commercial relationships with **refineries, producers, allocation holders, suppliers, logistics organizations, and strategic energy partners.**

Through established supply relationships and refinery allocations, the Company seeks to enhance product availability, strengthen supply-chain reliability, and provide qualified customers with access to competitive petroleum supply opportunities.

Effective allocation management can facilitate the coordination of product availability, refinery scheduling, loading programs, inspection procedures, logistics, shipping schedules, and international delivery requirements.

By continuing to strengthen its global supply network, Trafalgar Oil & Gas seeks to enhance operational flexibility and maintain dependable access to petroleum products for its international clients.

This strategy reflects our broader commitment to **responsible growth, operational excellence, supply-chain stability, and long-term participation in international energy markets.**

WHY TRAFALGAR OIL & GAS COMPANY

In the international petroleum industry, **trust is paramount.**

Trafalgar Oil & Gas Company is committed to earning and maintaining that trust through experience, transparency, responsible transaction management, professional communication, and consistent attention to the requirements of our clients and strategic partners.

Our core principles define how we conduct business:

INTEGRITY IN BUSINESS

Conducting commercial relationships with professionalism and transparency.

RELIABILITY IN SUPPLY

Developing dependable sourcing and supplying solutions for international customers.

QUALITY IN PRODUCTS

Maintaining a strong focus on product specifications, inspection, and quality requirements.

PROFESSIONALISM IN EXECUTION

Managing transactions with discipline, responsiveness, and attention to detail.

SAFETY IN OPERATIONS

Recognizing safety as a fundamental responsibility throughout the energy supply chain.

STRENGTH IN RELATIONSHIPS

Building lasting partnerships with customers, suppliers, refineries, and strategic partners.

COMMITMENT TO LONG-TERM GROWTH

Developing sustainable commercial relationships capable of creating value for all parties.

POWERING PROGRESS • CONNECTING GLOBAL ENERGY MARKETS •
BUILDING RELATIONSHIPS THAT LAST.

A MESSAGE FROM THE CEO OF
TRAFALGAR FUELS

OIL AND GAS SUPPLY TO THE WORLD

As CEO of Trafalgar Fuels, I am proud to lead a company committed to delivering reliable, efficient, and competitive oil and gas supply solutions to customers worldwide.

Our mission is to build long-term partnerships based on trust, integrity, and excellence, ensuring secure energy deliveries to destinations across the globe.

We remain dedicated to meeting the evolving needs of the energy market while maintaining the highest standards of professionalism and service.
